SUMMARY

IT professional working as an AI Engineer at Prasa Infocom & Power Solutions, building Python-based automation and Generative AI/LLM-powered solutions in a production environment, and contributing to internal business applications used across the company. Looking to grow further into a core Python Developer role, bringing hands-on Python, SQL, and automation experience gained from real internal projects.

TECHNICAL SKILLS

- **Core Programming:** Python, SQL, Object-Oriented Programming (OOP)
- **Database:** Microsoft SQL Server, SQL
- **Frontend (Working Knowledge):** HTML, CSS, JavaScript
- **Python Libraries:** Pandas, NumPy, Jupyter Notebook
- **AI / Generative AI:** Working with LLMs, prompt-based automation, document summarization & data extraction
- **Version Control & Practices:** Git (basics), Agile/Scrum, Jira, Application Testing & Debugging
- **Other Tools:** Power BI, Excel, Dashboard Development

WORK EXPERIENCE

Prasa Infocom & Power Solutions | Pune **Oct 2025 - Present**

AI Engineer | Software Development & Automation

- Built AI automation solutions using Generative AI and LLMs to automate document processing and business workflows.
- Developed an AI Resume Agent that extracts candidate information from resumes and stores structured data into SQL databases, replacing a manual data-entry process.
- Built ResumeChron AI, a tool that automates academic report generation, cutting manual effort and improving accuracy.
- Built financial reconciliation automations using Power Automate, eliminating repetitive manual matching work and reducing errors.
- PRASA VMS — Visitor Management System: internal visitor registration & security workflow app with QR-based check-in, role-based access, and AI/OCR-based ID data extraction.
- PRASA Corporate Voucher & Expense Management System: internal voucher/expense approval app with role-based access and GST/account mapping.
- PRASA Ticket Management System: internal employee ticket/request app with status workflow and admin dashboard.
- PRASA Task Tracker System: internal project/task tracking app for the Presales, Sales, and Project teams.
- Developed and packaged these internal applications as Windows .exe for internal PRASA use.
- Worked with cross-functional teams to gather requirements, debug issues, and ship features on schedule.

Technologies: Python, SQL Server, AI/OCR concepts, Generative AI, LLMs, Power Automate, Power BI, Git

PERSONAL & ACADEMIC PROJECTS

Spam SMS Classification — Data Science Internship Project

- Built a text classification model to distinguish spam from legitimate SMS messages; trained and evaluated a Logistic Regression model.

Technologies: Python, Logistic Regression, Text Preprocessing, Data Science

FinWise: Smart Financial Planning for Youth

- Built a Python-based financial planning app to help young users manage budgets, track expenses, and reach savings goals.

Technologies: Python, Data Analysis, Financial Analytics, Data Visualization

INTERNSHIPS

Data Science Intern — E-Cell IIT Roorkee **2 Months**

- Wrote Python code (Pandas, NumPy) to build and evaluate machine learning models.

Data Analytics Intern — Intern Studio **3 Months**

- Used Python for data processing and exploratory data analysis (EDA); visualized results in Power BI.

Data Analytics & Visualization Job Simulation — Accenture **2 Weeks**

- Completed a short simulation covering data analytics and visualization workflows using Excel and Power BI.

EDUCATION

Bachelor of Technology — Artificial Intelligence & Data Science
SSWCOE | 2022 – 2025 | CGPA: 7.81/10

Diploma — Computer Science
GPA | 2019 – 2022 | Percentage: 69.54%

SSC (10th)
SSVBPH, Panshet, Pune | 2019 | Percentage: 81%

CERTIFICATIONS

- Power BI, SQL & Python Certification — Infosys
- Data Analytics & Visualization Job Simulation — Accenture
